

Pond Maintenance

Date	Check Water Level	Add Beneficial Bacteria Weekly	Add AlgaeFix Weekly	Clean Skimmer Basket Weekly	Clean Skimmer Filter Mat Weekly	Cut Back Plants/Fertilize Monthly	Clean Rocks on Waterfall with EcoBlast	Clean BIOFALLS Filter Mat Bi-Monthly	Spot Treat Waterfalls Nov20- Mar15	

How many gallons of water in pond?	
Beneficial Bacteria - 1 scoop weekly	
AlgaeFix - controls all forms of algae. Read container for initial dosages. May need twice weekly in spring and fall. Safe for fish & plants. 10ml per 100 gallons.	
EcoBlast or Green Clean - Unplug pump. Remove all string algae by hand, shake EcoBlast directly on remaining algae on waterfalls, wait 10-20 minutes, Plug in pump.	
March-April: Drain pond, remove fish, power wash rocks, repot plants as needed, fertilize plants; power wash components to biofalls & skimmer, check & service all lights, dechlorinate refill water; add starter bacteria, reintroduce fish.	
Oct-Nov: Trim back plants, remove all plant debris. OPTIONAL: Cover pond with bird netting during leaf drop. Install pond deicer.
